

ArtemiS SUITE
Signal Processing

Code 51702

ASP 702 MDM Recording

MDM Recording of ArtemiS SUITE provides the quick and easy step-by-step performing of openMDM® measurement tasks.

OVERVIEW

ASP 702 MDM Recording

Code 51702

MDM Recording enables to easily execute openMDM® measurement tasks with the Recorder of ArtemiS SUITE.

The Task List of the Recorder is especially useful for standardized testing when, for example, performing a series of tests according to a required quality standard. This facilitates the generation and the step-by-step execution of the openMDM® recordings, including the respective documentation.

KEY FEATURES

Performing openMDM® measurement tasks with a Task List of the Recorder of ArtemiS SUITE

Automatic generation of a Recorder Task List from an openMDM® XML task file for executing measurement tasks

High flexibility in performing the recordings for the single Test Conditions

Documentation

- › The openMDM® documentation describing the single Test Conditions which are imported with the XML task file
- › The Recorder Task List enables the documentation to be edited
- › Additional Documentation Templates can be created very easily

Requirements:

- › Recorder (APR 040 is required)
- › Standardized Test Project (APR 220 is required)

APPLICATIONS

- › Automatic generation of complete openMDM® Task Lists containing the measurement tasks, the Test Conditions, and the documentation
- › Guided step-by-step execution of the openMDM® recordings

Process of openMDM® measurements

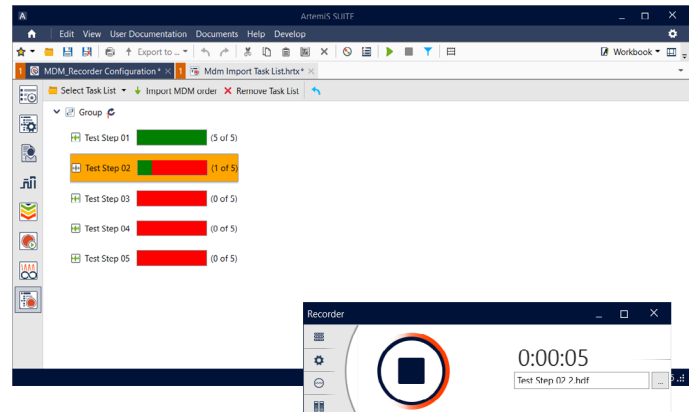

MDM Recording enables to easily perform openMDM® measurement tasks with the Recorder of ArtemiS SUITE.

With just one click, users can import an XML task file, which contains the measurement tasks of openMDM®, into the Recorder including the respective documentation. The Recorder automatically generates a complete Task List containing the measurement tasks, the Test Conditions, and the documentation contained in the XML task file.

The Recorder Task List enables the execution of the openMDM® measurements conveniently, while the Recorder Task List displays visual feedback of the progress of each Test Condition.

The documentation for each Test Condition can be edited and stored with the performed recordings so that the measurement results can be used for further openMDM® applications.

The Recorder Task List offers high flexibility in configuration. If required, unplanned steps, such as repeated measurements or adjustments of the Test Conditions can also be carried out.

Using the clearly structured Recorder Task List, users can control the progress of their measurements.

Required:

- › **APR 000 Framework (Code 50000)**
- › **APR 040 Recorder (Code 50040)**
- › **APR 220 Standardized Test Project (Code 50220)**
