

HEAD acoustics at DAGA 2018 in Munich

New products and live presentation

HEAD acoustics GmbH from Herzogenrath - a global market leader for engineering solutions in the field of sound design and optimization of voice and audio quality - participates in the 44th DAGA in the Bavarian capital. According to the motto "Munich listens!" new products and numerous trend-setting solutions will be presented at the HEAD acoustics booth (number 28/29) from March 19th to 22th.

HEAD acoustics performs a live presentation of the HEAD VISOR acoustic camera. Furthermore, SQobold, SQuadriga II und *lab*COMPACT24 will be presented to the specialist audience.

One highlight: The new modular multi-channel front end *lab*CORE. It has already attracted a great deal of attention at international trade fairs such as this year's Mobile World Congress in Barcelona. Booth visitors may also find out more about the new product HRT I: The high-precision turntable ensures accurate, direction-dependent, acoustic measurements.

Attractive lecture and supporting program

Traditionally, there are exciting specialist lectures for DAGA visitors. This year, HEAD acoustics presents eleven contributions with future-oriented topics including "In-Car Communication - Performance Parameters and Testing Procedures from the Users Point of View" (Dr. Hans W. Gierlich) or "The Concept of Dissonance for the Evaluation of Technical Noise" (Dr. André Fiebig). In addition to the lectures and the opportunity for professional exchange, the DAGA provides an attractive supporting program. A special highlight is the convivial evening in the "Kesselhaus & Kohlebunker" with live music and specially brewed "Akustiner" beer.

About HEAD acoustics

HEAD acoustics GmbH is one of the world's leading companies for integrated acoustic solutions as well as sound and vibration analysis. In the telecom sector, the company enjoys global recognition due to the expertise and pioneering role in the development of hardware and software for the measurement, analysis and optimization of voice and audio quality as well as customer-specific solutions and services. HEAD acoustics' range of services covers sound engineering for technical products, investigation of environmental noise, speech quality engineering as well as consulting, training and support. The medium-sized company from Herzogenrath near Aachen has subsidiaries in China, France, Japan, South Korea, the UK and the USA as well as numerous sales partners worldwide.
